## THE DIGESTIVE SYSTEM

Connect the Digestive Organ with its name and function.

<u>ORGANS</u>	<u>ORGAN NAMES</u>	<u>ORGAN FUNCTIONS</u>
	• oesophagus (gullet)	Absorbs water and minerals
	• large intestines	Moves food around in mouth to mix with saliva
	• tongue	Long tube that takes food from mouth to stomach
	• salivary glands	Absorbs digested nutrients into the blood to get to rest of body
	• small intestines	Contains acids that break up the food and kill any germs in food
	• stomach	Produces saliva that contains chemicals to break down starch
