Prepositions of place with questions and answers

We can use the verb **be** to ask **yes/no** questions. We change the word order for questions.

Statement	Question	Answer
The lamp is next to the sofa.	Is the lamp next to the sofa?	Yes, it is. ✓
		No, it isn't. ✗

Next to, on, in, and between are prepositions of place. They tell us where something is.

<p>The phone is next to the armchair.</p> 	<p>The handbag is in the box.</p> 	<p>The lamp is on the sofa.</p> 
--	--	--

Between means "next to two things", so we use **and** to say the two things on each side.

The doll is **between** the table **and** the armchair.
