

美里廉律中山学校  
一年级科学年终评估

一 在相关的操纵性技能的格子内打勾(✓)。

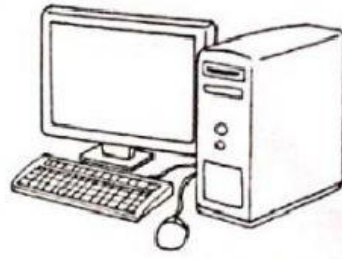

|                                                                                   |                                                        |  |
|-----------------------------------------------------------------------------------|--------------------------------------------------------|--|
|  | 用正确的方法清洗科学用具。<br>Clean science apparatus.              |  |
|                                                                                   | 正确及小心处理标本。<br>Handle specimen correctly and carefully. |  |

|                                                                                   |                                                                           |  |
|-----------------------------------------------------------------------------------|---------------------------------------------------------------------------|--|
|  | 准确地画出标本、科学用具和材料。<br>Sketch specimens, substances and apparatus correctly. |  |
|                                                                                   | 正确及小心处理标本。<br>Handle specimen correctly and carefully.                    |  |

二 有遵守科学室规则的学生画 (✓)

三 根据下图，选择“生物”或“非生物”。

|                                                                                     |                         |                                                                                      |                         |
|-------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------|-------------------------|
|  |                         |  |                         |
| 生物<br>living thing                                                                  | 非生物<br>non-living thing | 生物<br>living thing                                                                   | 非生物<br>non-living thing |

#### 四 看图选择正确的感觉器官

#### 五 将相关的生物基本需求拖拉到正确的格子内

食物 food

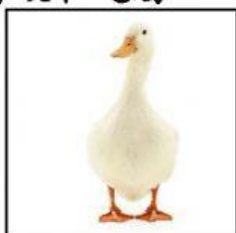

水 water

空气 air

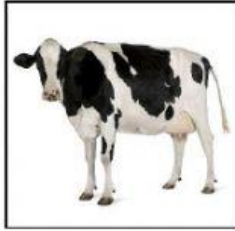

|                                                                                    |                                                                                    |                                                                                      |
|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
|  |  |  |
|                                                                                    |                                                                                    |                                                                                      |

#### 六 根据说明，选择相关的动物。

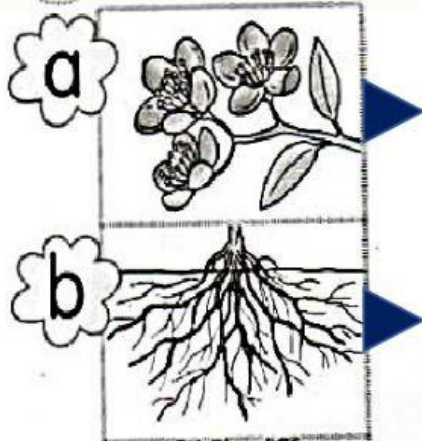

1. 它有蹼和翅膀。 It has webbed feet and wing.

它有鳞和尾巴。It has scales and tail.

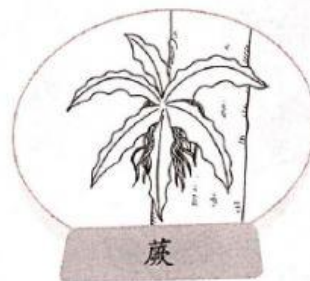

七. 植物的各部分有哪些功能? 连一连。

吸收水分和养料  
absorbs water and nutrients

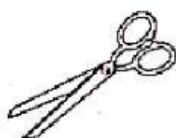

繁殖后代  
Helps plants to reproduce

八. 以下植物有哪些共同点, 请打勾 (✓)。

|   |                                  |  |
|---|----------------------------------|--|
| 1 | 能自己制造食物<br>Both can make food    |  |
| 2 | 会开花<br>Both flowering plant      |  |
| 3 | 有主根<br>Both have taproot         |  |
| 4 | 有根和叶子<br>Both have root and leaf |  |

九. 能被磁铁吸引的物体打勾 (✓)。

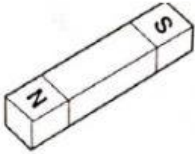

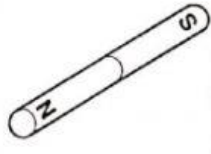

十. 将正确的磁铁名称拖拉到正确的格子内。

环形磁铁  
ring magnet

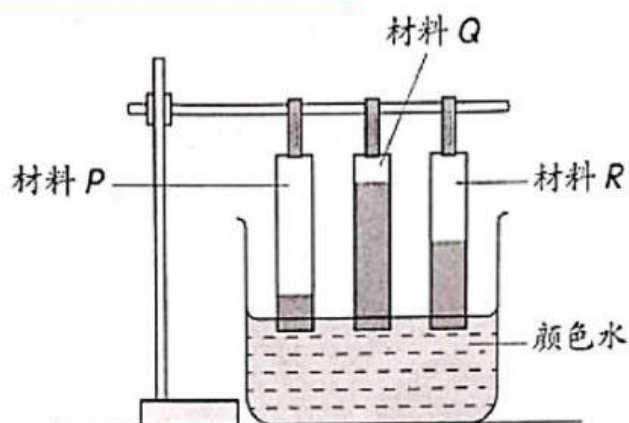

马蹄形磁铁  
horseshoe magnet

条形磁铁  
bar magnet

棒形磁铁  
cylinder magnet

|                                                                                   |                                                                                   |                                                                                    |                                                                                     |
|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|  |  |  |  |
|                                                                                   |                                                                                   |                                                                                    |                                                                                     |

十一. 根据实验结果回答问题。

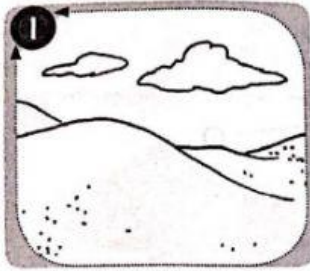

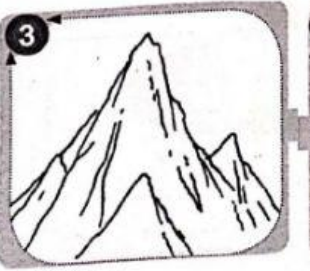

- 所吸的水最多。

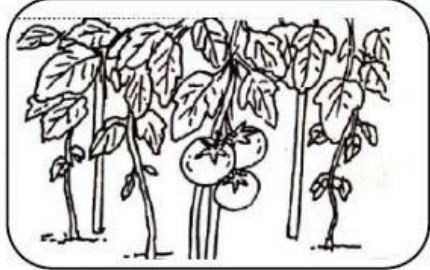

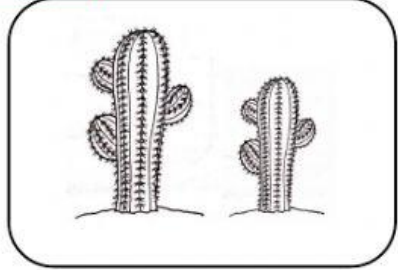

absorbs water the most.
- 所吸的水最少。

absorbs water the least.

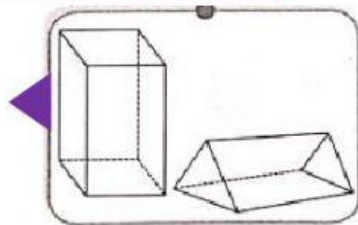

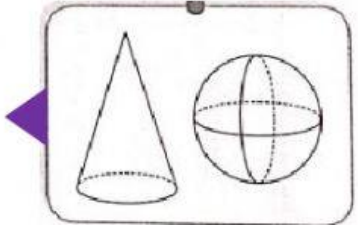

## 十二. 看图选择正确的地形。

|                                                                                   |                                                                                   |                                                                                    |                                                                                     |
|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|  |  |  |  |
| <div></div>                                                                       | <div></div>                                                                       | <div></div>                                                                        | <div></div>                                                                         |

## 十三. 根据图中的植物，选择适合的土壤。

|   |                                                                                    |   |                                                                                     |
|---|------------------------------------------------------------------------------------|---|-------------------------------------------------------------------------------------|
| 1 |  | 2 |  |
|   | <div>壤土</div> <div>garden soil</div>                                               |   | <div>壤土</div> <div>garden soil</div>                                                |
|   | <div>黏土</div> <div>clay soil</div>                                                 |   | <div>沙土</div> <div>sand</div>                                                       |

## 十四. 以下物品是由什么基本立体组成的？画线连一连。

|   |                                                                                     |                                                                                      |
|---|-------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| 1 |  |  |
| 2 |  |  |
