

## Watering Plants

You have decided to start taking care of plants as a hobby. The plants you got from the store require 4 ounces (oz.) of water to 1 plant. You can use ratios in a table to find out how much total water you would need as you got more plants. Remember, what you do to one side, you have to do to the other side.

Ounces of water	Number of plants
4 oz.	1 
	2 
	3 
	4 
	5
