

1. Matching the equation and the solution of equation

1.
$$z - 3 = 7$$

2.
$$18 + x = 36$$

3.
$$2x + 5 = 45$$

4.
$$-2 = -15 + m$$

$$5. -24y = 168$$

2. Fill the solution of equations in the blanks

1.
$$k + 5 = 16$$

therefore

2.
$$\frac{40}{m} - 3 = 2$$

therefore

3.
$$7n + 15 = 43$$

therefore

4.
$$8p - 7 = 65$$

therefore

5.
$$\frac{x}{12} + 18 = 21$$

therefore
