Multiplication Word Problems

Read each word problem. Set them up your notebooks and solve them. Only type your answer in the boxes. (3pts. each)

1. Mr. Brown class checked on how much time her students spend doing homework. If all 23 students spend 20 hours a week, how much homework do the students do in a week?

2. A cable program loans channels boxes to 21 community centers for a trial program. If there are 12 boxes for each center, how many boxes are being loaned?

3. A girls' club is trying to get into the record books for the most hair braids. There are 372 girls. If each girl braids her hair into 40 little braids, how many braids will they have?
