1. Read the text below about life stages

There have been lots of studies about adolescents, and the way they experience this stage of life depends on different factors. To understand this **interesting** stage, we can **go through** the cycle of life. Before we are born, it is **amazing** how we grow inside our mothers for about forty weeks, and once outside, the time we take to grow up goes **by fast**. Then comes our childhood, time to discover the world and learn many things. After that, we go through one of the **most challenging** stages in life, our teenage years called "adolescence". Later, when we think we are mature and everything will be simpler, we are sometimes more **confused**. We decide if we want to have a family or to be alone, to make money, to travel the world, to buy things like houses, cars, or even more **sophisticated**, a yacht or a helicopter. If things go wrong, we get **disappointed**. Finally, we become **elderly**, we are **relaxed**, but health problems usually start unless you **lead** a healthy life, which is uncommon these days.

Hi Mary!

I’ve just seen a funny film – ‘Ted 2’. As you know, I love comedy films. I think it’s the most excited film, I’ve ever seen. Jane and I had to wait for twenty minutes to get into the cinema as there was a huge queue – very boring! At last after that tired day at school we took our seats and felt relaxed. We enjoyed the comedy and the end was really surprised!

Well, how was your trip to Chester? Was it interested? I’m looking forward to meeting you here Saturday! I’m really very excited about it! I can’t wait!
