## Plant Needs

## Habitats

A habitat is a place where animals get food, water and shelter from. Some animals live in water only they are called “aquatic animals.” Some aquatic animals can live in habitats such as the sea like a fish, or oceans like a whale. Another type of habitat is a desert. A desert is a dry place with little to no water. Some animals that can survive in this habitat are camels and rattlesnakes. Some plants such as a cactus can live there also.

## The Creation Story

**The first day (1<sup>st</sup>)** - light was created.

**The second day (2<sup>nd</sup>)**- the sky was created.

**The third day (3<sup>rd</sup>)**- dry land, seas, plants and trees were created

**The fourth day (4<sup>th</sup>)**- the sun, moon and stars were created

**The fifth day (5<sup>th</sup>)** - creatures that live in the sea and creatures that fly were created.

**The sixth day (6<sup>th</sup>)** - animals that live on the land and finally humans, made in the image of God were created.

**The seventh day (7<sup>th</sup>)** - God finished his work of creation and rested, making the seventh day a special holy day.

## 7 Days of creation

## Living and non- living things

Plants and animals are living things. Living things are alive. They can grow, need air and water. Plants need soil and sunlight to grow. Animals need food to stay alive.

Non-living things are not alive. They do not move, grow, need food, water and air. An example of a non-living thing is a rock.

## Science: Living or Nonliving

### Living Things

- Move
- Grow
- Need food
- Need water
- Need air

### Nonliving Things

- Do not move
- Do not grow
- Do not need food
- Do not need water
- Do not need air
