

## Tuesday 23/11/21: Reading time

Siberian tiger

These large cats are Siberian tigers. They live in the jungles and mountains in Russia, China and Korea. They are orange or brown with black stripes. They eat fish and birds and sometimes bears. They sleep during the day and eat at night. There are about 500 Siberian tigers in the jungles.

1. Where do Siberian tigers live?

2. What do they eat?

3. When do they sleep?

4. What color are they?
