B Listen and number. (CD1 51)

Is that yellow and blue bird a macaw? It has colorful feathers.
Yes, it is. We learned about them in school. There are eighteen different kinds of macaws.
There's a red and green one over there. I'm going to take a picture of it!

What kind of bird is that, Ms. Spelling? It's white and has long wings.
Here it is in our book. It's called an egret. They eat fish and frogs.
I like the egret. It's plain, but it's very pretty.

There's a big cat next to the river. It looks dangerous.
That's a jaguar. It's smallest than a lion or a tiger, but it is dangerous.

Is that tree moving? Yeah, it's a spider monkey. It's climbing in the tree. There's a sloth in the tree, too. The spider monkey is energetic, but the sloth is calm. I think you're more like the spider monkey, Danny! Hey!

Julie, look at that dolphin!
Wow, it's pink! Excuse me, sir. What kind of dolphin is that?
That's a river dolphin. They're very friendly. They live in South America.
