

Name: \_\_\_\_\_ REVIEW ON THE UNIVERSE 2 – UNIT 1.

## **Earth and its movements. Read and fill in the gaps.**

The Earth makes two different movements:

\_\_\_\_\_ and \_\_\_\_\_

A) Earth's \_\_\_\_\_

Earth \_\_\_\_\_ on its axis.

Earth takes one \_\_\_\_\_ (\_\_\_\_ hours) to spin completely around itself.

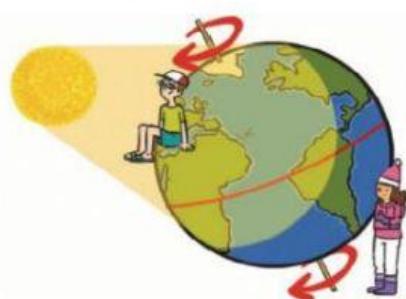

Earth's rotation causes \_\_\_\_\_ and \_\_\_\_\_ .

B) Earth's \_\_\_\_\_

Earth \_\_\_\_\_ around the Sun.

Earth takes one \_\_\_\_\_ to orbit completely around the Sun.

Earth has got a tilted \_\_\_\_\_

As its axis is tilted, the sun's rays reach at different angles as earth moves around its orbit.

This causes the four **seasons**. They are:

\_\_\_\_\_, \_\_\_\_\_,  
\_\_\_\_\_ and \_\_\_\_\_.

This is the reason why it is \_\_\_\_\_ in the northern hemisphere and \_\_\_\_\_ in the south hemisphere
