Choose the correct answer

In countries like Niger and Mauritania, the *cultivation* of land has changed little in the past several centuries. Additionally, these countries' mono-modal rainfall pattern brings *precipitation* for only three months during the year. As a result, food production doesn't nearly meet demand.

Bonus Structure—
As a result means
"therefore," "for
this reason."

Several agencies and organizations have *intensified* their efforts to increase the productivity of land in these countries. They have introduced new strains of seed, improved *irrigation* techniques, and introduced new methods of *fertilization* and soil management. With ample sunlight for *photosynthesis* and modern *irrigation* techniques, sustainable farming techniques should allow farmers to boost *aggregate* production in order to meet demand.

Still, crop revitalization faces an unexpected adversary: institutional incompetence. Where crop specialists have convinced individual farmers to *abandon* old farming techniques in place of new, they can't readily *obtain* the governmental cooperation they need. The biggest hurdles are political corruption, incompetence, and the absence of a marketing infrastructure.
