Unit 3

Tomorrow Calling

Houses of the Future

Listen and answer the questions.

1 Why haven't home developers been using organic material?

2 Why will it take longer for technology to be a part of our homes?

3 What is an example of smart home automation?

4 What do people currently use robots at home for?

5 How will the houses of the future be energy efficient?

a. They will have sensors to reduce energy use in rooms.

b. Turning on the water heater while outside the house/using their smartphone.

c. Because they have been thinking about creating homes with cost-efficient and long-lasting material.

d. To clean the floors.

e. Because it's expensive
