UNIT 7: LINES AND ANGLES

## Lesson 1: Lines and segments

I. Basic knowledge

- A **line** extends forever in both directions, like this

- A **line segment** is just a part of a line. It has two endpoints, like this

- Line segment AB is 10cm long.

  A _____ 10cm _____ B

- A **ray** is just a part of a line. It has one endpoint and extends forever in one direction, like this

- We can **measure** the length of a line segment, but not of a line or a ray.

II. Vocabulary

English words	Meaning	English word	Meaning
Line	Đường thẳng	Point	Điểm
Extend	Mở rộng	End point	Đầu mút
Direction	Hướng	Ray	Tia
Line segment	Đoạn thẳng		

III. Practice

1. Write the missing letter.

a. li__e

b. r__y

c. l__ne se__me__t

d. p__int

2. Tick (✓) the correct option.

a. What is this?

☐ Point
☐ Line
☐ Line segment

b. What is this?

☐ Point
☐ Line
☐ Line segment

c. What is this?

☐ Point
☐ Line
☐ Ray

d. What is this?

●

☐ Point
☐ Line
☐ Line segment

e. What is this?

☐ Point
☐ Ray
☐ Line segment

f. What are these?

●

☐ Ray and point
☐ Line and point
☐ Line segment and point
