Worksheet about types of rocks. Look at the picture of each rock and its description, then drag it to the right box.

Obsidian, also called volcanic glass. This rock is amorphous, meaning it has no crystals.

Gabbro. The colour is dark, so there is probably metals in this rock (Fe and Mg).

Gneiss. This rock is foliated, because it has bands/ stripes like a zebra!

Coal. When many pieces of dead plant material accumulate, and is later compacted.

Igneous intrusive

Igneous extrusive

Metamorphic rock

Sedimentary rock
