Part 3: Reading Comprehension Test

My name is Carrie. My sister Mariah was always sick when we were kids. When she was five, Mariah had the measles. It looks like chickenpox but it's not the same. There were spots all over her forehead. Soon they were all over her neck, arms, and feet. They looked like a big rash. She also had a fever and an earache. When Mariah was seven, she broke her arm. She had to go to the doctor and get an x-ray. It took a few months for the bone to heal. When she was ten, she got a virus. She coughed and sneezed all night. She had to take medicine and stay in bed for two weeks. Mariah is healthy now. I hope she stays that way.

Circle true or false

1. Mariah got the measles when she was five.

2. Mariah had to get an x-ray because she broke her arm.

3. When Mariah got the measles, her body was covered in spots.

4. Carrie got a virus when she was ten.

5. Carrie had to take medicine because of the virus.
