Full name: **Date of birth:** **ID number:** **Class:**	**FINAL REVIEW TEST** **Grade: 10** **School year: 2020 -2021** **Time: 25 minutes**
Mark: Comment:	

I. Read the passage carefully and decide if the statements are True or False. (2.5 pts)

Marie Curie was born in Warsaw on November 7th, 1867. She received general education in local schools and some scientific training from her father. As a brilliant and mature student, Marie harboured the dream of a scientific career, which was impossible for a woman at that time. To save money for a study tour abroad, she had to work as a private tutor, and her studies were interrupted.

Finally in 1891, Marie, with very little money to live on, went to Paris to realise her dream at the Sorbonne. In spite of her difficult living conditions, she worked extremely hard. She earned a degree in Physics with Hying colours, and went on to take another degree in Mathematics. She met Pierre Curie in the School of Physics in 1894 and a year later they got married. From then on, they worked together on their research. In 1903, Marie became the first woman to receive a PhD from the Sorbonne.

Statements	**True**	**False**
