

DEMOSTRAMOS NUESTROS APRENDIZAJES EN GEOMETRÍA

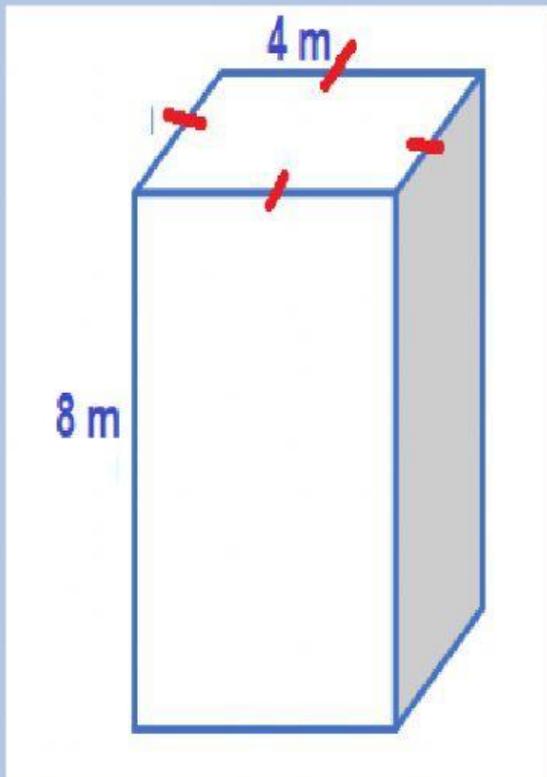

1. Halla las medidas según se indica:

$$A \text{ (base)} = \underline{\hspace{2cm}} \text{ m}^2$$

$$A \text{ (Cara lateral)} = \underline{\hspace{2cm}} \text{ m}^2$$

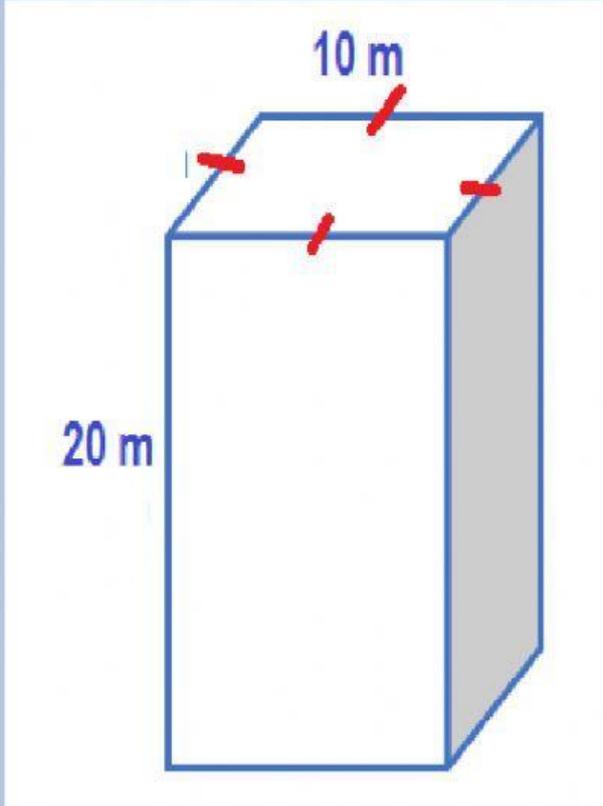

$$A \text{ (total)} = \underline{\hspace{2cm}} \text{ m}^2$$

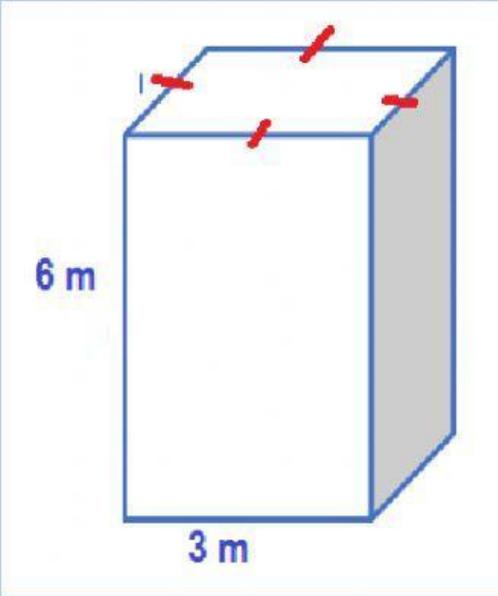

$$A \text{ (base)} = \underline{\hspace{2cm}} \text{ m}^2$$

$$A \text{ (Cara lateral)} = \underline{\hspace{2cm}} \text{ m}^2$$

$$A \text{ (total)} = \underline{\hspace{2cm}} \text{ m}^2$$

$$\begin{aligned} A \text{ (base)} &= \underline{\hspace{2cm}} \text{ m}^2 \\ A \text{ (Cara lateral)} &= \underline{\hspace{2cm}} \text{ m}^2 \\ A \text{ (total)} &= \underline{\hspace{2cm}} \text{ m}^2 \end{aligned}$$

$$\begin{aligned} A \text{ (base)} &= \underline{\hspace{2cm}} \text{ m}^2 \\ A \text{ (Cara lateral)} &= \underline{\hspace{2cm}} \text{ m}^2 \\ A \text{ (total)} &= \underline{\hspace{2cm}} \text{ m}^2 \end{aligned}$$

PROF. GISELLE BENIQUE
