Life Cycles of Animals

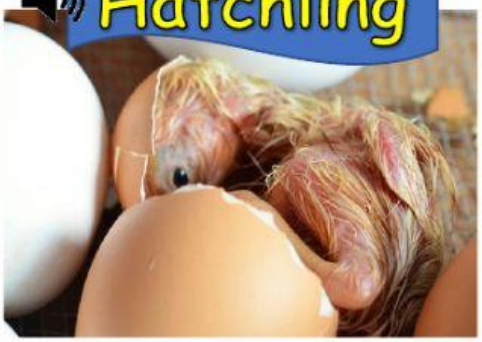

A life cycle is a series of changes that a living thing goes through during its life.

Eggs

The hen lays and broods the eggs.

Hatchling

A hatchling breaks out of the egg.

Life cycle of a chicken

Chick

Big feathers start to develop and the chick rows into an adult chicken.

Adult chicken

When mature, the rooster and the hen mate and reproduce.

LIVEWORKSHEETS

Life cycle of a cat

Newborn kitten

A kitten is born alive by a female cat.

Kitten

The kitten likes to play around and learn about its environment.

Adult cat

The mature male and female cats mate and reproduce their own offspring.

Teacher Michelle
