- A. AN ELECTRICAL BALANCER
- B. PUT IT INTO MOTION
- C. ACCESSORIZING YOUR HOME
- D. AN ACCESSORY TO WATCH FOR
- E. ELECTRIFY YOUR GERMS
- F. THE SMART REPORT

### HEALTH TECHNOLOGY

What is that all about?

There has been a lot of criticism about how new technology is doing more harm than good to people's health. There is, however, another side to this coin. There have been many gadgets developed to solve health problems and improve the quality of life for many people. Here are just a few examples.

1

Employees who work on a desktop computer all day know about pain. The repeated movements on the keyboard are restricted, leading to muscle strains and swelling. A new device has come out that promises to reduce this type of stress injury. It is a keyboard that can change its position according to your typing patterns and make your days at the office more enjoyable.

2

If you are into jogging or running, there is the new Sport Watch GPS that promises to improve your workouts. The GPS tracking connects to the special shoe sensors. You get continuous data on your watch about your pace and distance for each run. There are reminders and awards for personal achievements as well as ways to encourage you and keep you motivated. At the end of a run, just plug your watch into your PC and send the information to the company with your results.

3

Who would believe a smart phone could save a life? Well, one of the most popular smart phones on the market now offers a gadget that can monitor your heart rate and blood pressure. You can measure your heart rate from just about anywhere and send in reports to your doctor. It even prepares graphs that you can send along with your data. For people at risk of heart failure, this gadget can be a life-saver!

4

Since when does jewelry improve health? Actually, although the health bracelet has been around since 1945, it has grown in popularity in recent years. It functions like an electrical

current or “brain wave”. It is usually gold or silver-plated in order to pick up electrical currents in the air and transmit them to the body just like the brain does. When the brain is tired or stressed, it fails to send out proper signals to the body which can lead to many illnesses. The health bracelet restores your lost energy and helps bring balance to your body.

5	
---	--

We all know how important it is to wash vegetables in order to prevent food poisoning. However, studies have shown that washing may not be enough. According to scientists, microbes have a way of protecting themselves from common solutions. So they have come up with a device that shoots electron beams on food and kills anything that shouldn't be there, and without the use of chemicals. Take it a step further and treat your water with this and it will become a stronger house cleaner for germs than chlorine itself

### PART 6

I don't really have a hero. There are many people I \_\_\_\_\_, but they are not really my hero. Some people choose very strange heroes. My friends have \_\_\_\_\_ and football players as heroes. Of course, these people are very good at what they do, but they're not really heroes. They get lots of \_\_\_\_\_ for doing what they love. When they're not singing or playing football, I wonder what they're doing. I think most of the world's heroes are unsung heroes. People who work to help others every day. We generally don't notice these heroes. Then there are those who put their lives on the line for others. \_\_\_\_\_, police officers and soldiers are heroes. Without them, the world would be \_\_\_\_\_.

### PART 7 (5 points)

Listen and match the problems (A-F) to the speakers (1-5). There is one extra problem.

<b>Speaker 1</b>	
<b>Speaker 2</b>	
<b>Speaker 3</b>
