Test 4

LISTENING

Task 1 Перед Вами 5 предложений A-E с пропусками и варианты слов или словосочетаний для заполнения этих пропусков, обозначенные цифрами 1-3. Внимательно прочитайте их. Вы услышите диалог. Для каждого предложения A-E выберите слово или словосочетание, соответствующее содержанию диалога. К каждому пропуску подходит только один вариант ответа. Вы услышите запись дважды. При повторном прослушивании проверьте себя. У вас есть 45 секунд, чтобы ознакомиться с предложениями.

A. The man has _____.
B. One colouring book costs _____
C. The children's birthday is on _____.
D. Each grandchild will get _____.
E. The man's daughter likes to _____.

READING

Task 4 Установите соответствие между текстами A-E и их темами, выбрав тему 1-6 из списка. Используйте каждую тему только один раз. В задании одна тема лишняя.
This text deals with …

A. Alaska is a US state located on the northern edge of North America across the Bering strait from Asia. It has a sea border with Russia. It is the largest state in the US and at least densely populated. Alaska was first colonized in the 17th century by Russia. However, in 1867 it was bought by the United States for 7,2 million dollars.

B. About half the population of Alaska is white, the rest is mostly made up of American Indians, Alaskan Natives and Asians. Over 5% of the population of Alaska speak one of the twenty native languages. Most of the people living in Alaska are Christian and since there are still a lot of Russian immigrants living in Alaska there has been an increasing number of Russian Orthodox churches appearing, the first one having been built in 1795.

C. In 1968 oil was discovered in Alaska at Prudhoe Bay, and in 1977 the Trans-Alaska Pipeline System was built. This resulted in a huge oil boom. Since then Alaska has funded large state budgets and canceled its state income tax. One of the biggest issues in Alaska today is the ongoing argument about whether or not there should be oil drilling in Arctic National Wildlife Refuge.

D. Alaska includes many islands, some of the most well-known are the Aleutian Islands. These islands are home to many active volcanoes. Alaska has more than three million lakes. A lot of the terrain is covered with glacier ice. The climate of Alaska is subarctic with the lowest recorded temperatures reaching -62 degrees Celsius.

E. Denali National park and Preserve is a national park located in the central region of Alaska. The park surrounds mount Denali – the highest mountain in North America (6144m). The terrain of the park consists of a mix of forests, including the taiga, as well as tundra, glaciers, snow and bare rocks. In the winter you can go dog sledding, skiing and snowmobiling.
