

## UNIDAD EDUCATIVA "MIGUEL ÁNGEL LEÓN PONTÓN"

Dirección: Luz Elisa Borja y Colón

AÑO LECTIVO 2021-2022

Riobamba – Ecuador FICHA PEDAGÓGICA

## ACTIVIDADES SEMANA 15 del 6 al 10 de Diciembre DEL 2021

### 3RO BACHILLERATO TECNICO

OBJETIVO DE APRENDIZAJE:

OBJETIVO SEMANAL: At the end of the lesson student wil be able to learn passive voice.

ASIGNATURA: INGLÉS

TOPIC: Natural disasters in Ecuador

OBSERVE:

What are some natural disasters you know?

Who or what do you think causes them?

#### REFLECTION:

#### Natural disasters

There is a high risk of earthquakes, volcanic eruptions and tsunamis. You should make sure you are aware of the risks and are familiar with the relevant safety and evacuation

## WHAT YOU SHOULD KNOW:

#### Natural Disasters in Ecuador

There are different types of natural disasters that occur in Ecuador; one is an earthquake. An earthquake happens when the plates of the earth move against each other. Hundreds of earthquakes have been recorded in Ecuador. The strongest earthquake in the country that has been measured

was on December 12, 1979. It happened in the Pacific Ocean on the border between Ecuador and Colombia and measured 8.2 on the Richter scale. It caused a tsunami, which is another type of natural disaster. It is a long high wave that can cause a lot of destruction. Volcanic eruptions are another type of natural disaster. In Ecuador, including the Galapagos Islands, 27 potentially active volcanoes have been counted. Some of the most famous of these are the Cotopaxi, Reventador,

Cayambe, and Tungurahua. Volcanoes can be erupting, active, dormant (not active but may be in the future), or extinct (has not erupted in over 10,000 years). The state of Ecuador's volcanoes has been monitored for decades. Wildfires are also a natural disaster that occur in Ecuador. During the past few years, more and more wildfires have been registered, especially during the summer months of June, July, and August in the highlands. Many acres of land have been burned. When the weather is dry and warm, wildfires are more likely to occur. We have to be careful because with these conditions, fires can spread quickly and destroy a lot of land.

## 1. Read the text againg and write true or false

Statements	TRUE	FALSE
An earthquake happens when the plates of the earth move against each other.		
The strongest earthquake in the country that has been measured was on December 12, 1979. It happened in the Atlantic Ocean.		
The strongest earthquake in the country that has been measured 6.5 on the Richter scale. It caused a tsunami, which is another type of natural disaster.	35	
Wildfires are also a natural disaster that occur in Ecuador.		
Wildfires have been registered, especially during the summer months of november, december, and January in the highlands.		20

2. Complete the explanations of the following pictures with the words given.

volcano	earthquake	avalanche	hurricane	flood	wildfire
tornado	tsunami	landslide	drought	famine	

A\_\_\_\_\_is a storm with very strong winds.

An\_\_\_\_\_\_ is a large amount of snow which falls down a mountain.

A\_\_\_\_happens in hot weather when an area od forest is very dry.
