 A diagram of the Earth showing its axial tilt. The Earth is a blue and green sphere. A red line represents the axis, passing through the center. The top of the axis is labeled 'North Pole' and the bottom is labeled 'South Pole'. The axis is tilted at an angle, and there are curved arrows at both poles indicating rotation.			
 A diagram showing the Earth's orbit around the Sun. The Sun is a large orange sphere. The Earth is a smaller green and blue sphere. A blue elliptical line represents the orbit, with arrows indicating the direction of travel around the Sun.
