Dear Jodi,

Sorry I haven't been in touch with you for such a long time, but it's been a few busy months.

Earlier this year, I received good news that my great-aunt had given me a cottage. Apart (26) _____ seeing her a couple of times at my parents' house, I didn't really know her. When I saw the cottage, I just fell in love with it. It's close to a beautiful little village, and looks out (27) _____ the sea. My great-aunt used it as a holiday home, and I've decided to do the same. Unfortunately, it's been badly looked (28) _____, so I've had to spend most weekends this year sorting the place out.

I knew it was (29) _____ need of some work, and at first I thought I could get away with giving it a quick coat of paint. But I soon realized it was much a bigger job. There were holes in the roof, and the window frames were so rotten, some of the panes of glass were in danger of falling out.

I was walking around the village one Saturday, wondering what best to do, when who should I run (30) _____ but Barney Adams. Do you remember him from school? As luck would have it, he now works in the village as a builder and decorator. We got talking, and he said he'd come over and look at the house.

Naturally, I took him up (31) _____ his offer! He got really enthusiastic about it. He talked me into replacing all the windows, and he's put in a new central heating system in place (32) _____ the old coal fires. I've had to prevent him (33) _____ extending the kitchen, which he was keen to do! He's checked the roof out and fortunately that doesn't need replacing. Thanks to Barney, the house is now looking brilliant, and (34) _____ comparison with other builders, he doesn't charge very much.

The next project for me is to clean (35) _____ the mess in the garden, as it's completely overgrown. If you want to come over and help me some time, feel free! You'll always be very welcome.

Love,

Emily

Pasture mismanagement is one of the main pressures on biodiversity. The unsustainable use of grazed pasture without giving plants time to recover has modified vast areas of grasslands. This kind of continued defoliation has led to desertification and erosion.

Australia’s fisheries are already close to collapse because of this activity, and the problem is getting worse. There are two major factors which account for the problem: slow regeneration of marine populations and depletion of fish stocks by commercial over-exploitation.

70-71. _____

It is estimated that Australia gains around 20 new pests each year. Examples include cane toads, willows and, more recently, red fire ants. Historically, feral cats and foxes have been a cause of local extinctions and reductions in range for native species through a combination of habitat modification and predation.
