- b. getting back to my story
- c. looking back
- d. no wonder

Reading

H. Click on the button and read the article. Then read the statement and choose true, false or not given if the information is not given.

Young Hero: Louis Braille

You have probably heard of the Braille alphabet, but did you know it was invented by a 15-year-old-boy? Louis Braille was born in France in 1809. At the age of three, he had an accident that left him completely blind, but his parents wanted to raise him like other child (which was unusual for the blind at the time) and sent him at the local school. Louis was a clever and lively child and, even though he was only able to listen in class, he was soon one of the best students. When Louis was ten, he was encouraged to attend one of the first schools for blind children in the world located in Paris. The school's founder had developed a system of raised Roman letters to help his students read, but the system resulted in books that were very large and heavy and students couldn't use it to write. It was another man Charles Barbier, a captain in the French army, who gave Braille the idea for his famous alphabet. Barbier had invented a system of raised dots on the page so that his soldiers could communicate silently at night without a light. By the age of 15, Braille had adapted Barbier's system into an alphabet that allowed blind people not only to read, but to write as well. He eventually became a well-respected teacher but his alphabet only became widely used after his death.

- | | | | |
|---|------|-------|-----------|
| 1. Louise was raised like most other blind children of the time. | True | False | Not given |
| 2. Braille's ideas were copied by the founder of the special school. | True | False | Not given |
| 3. There were many large and heavy books at the special school for the blind. | True | False | Not given |
| 4. Charles Barbier's system influenced Louis Braille. | True | False | Not given |
| 5. Barbier's system used raised Roman letters. | True | False | Not given |
| 6. Braille's alphabet allowed students to write as well as read. | True | False | Not given |

Writing

I. Write a narrative article about a time that you had problems with one of your teachers. What happened and what you did to solve it. Use narrative verbs. Write 70 to 90 words.
