7. You a. must / b. mustn't destroy animals' habitats.
8. You a. should / b. shouldn't recycle plastic, glass and paper.

C. Match the sentences I – VIII with the pictures a – h.

Hi! My name is Steve Harrold. I study at Hampstead High School. My friends and I want to do something for environment. We know that humans and factories are responsible for pollution and global warming.

(I) People pollute the air because they prefer driving their own cars instead of using public transportation. **(II)** Factories and industries emit gases and toxins into the atmosphere. **(III)** Factories also pour their waste into the ocean and cause water pollution. **(IV)** Soil and water pollution kill plant and animals. Global warming is another threat to our environment. When factories, industries and cars emit greenhouse gases, these gases stay in the atmosphere and warm the climate. Global warming is also a very big treat to animals because it destroys their habitats.

We still have a chance to save the environment. **(V)** We should make campaigns to stop pollution. **(VI)** We should recycle plastic, glass and paper. **(VII)** We should use renewable energy resources. **(VIII)** We should plant more trees and go green!
