

### Fact about structure of the Earth

1. The earth has \_\_\_\_\_ layers.
2. The \_\_\_\_\_ is solid iron and nickel.
3. The \_\_\_\_\_ is liquid iron and nickel.
4. The \_\_\_\_\_ is like play dough because of the intense heat. It moves slowly.
5. The \_\_\_\_\_ is granite and other solid rock that float as plates on the mantle.
6. Earthquakes, volcanoes and mountains often occur at the \_\_\_\_\_.

### Facts About the Earth's Surface

1. The Earth's surface is \_\_\_\_\_ land and \_\_\_\_\_ water
2. The largest land mass is called a \_\_\_\_\_.
3. These large land masses are divided up into \_\_\_\_\_.
4. A country is an area of land \_\_\_\_\_.
5. There are 7 continents.
6. The largest areas of water are called \_\_\_\_\_.
7. There are 5:

1. The Equator divides the earth into a \_\_\_\_\_ and \_\_\_\_\_ Hemisphere.
2. The 3 continents **entirely** in the Northern Hemisphere are:  
Asia   Africa   North America   South America   Antarctica   Europe   Australia
3. The 2 continents **entirely** in the Southern Hemisphere are:  
Asia   Africa   North America   South America   Antarctica   Europe   Australia
4. The continent **mostly** in the Northern Hemisphere is  
Asia   Africa   North America   South America   Antarctica   Europe   Australia
5. The continent **mostly** in the Southern Hemisphere is  
Asia   Africa   North America   South America   Antarctica   Europe   Australia
6. The \_\_\_\_\_ Hemisphere has more land than the \_\_\_\_\_ Hemisphere.
