

ÁREA LATERAL Y TOTAL DE LOS PRISMAS

1. Calcula el área lateral del prisma

$A_L = \text{Perímetro de la base} \times \text{altura}$

$$A_L = (\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad}) \times \underline{\quad} \text{ cm}$$

$$A_L = \underline{\quad} \text{ cm} \times \underline{\quad} \text{ cm}$$

$$A_L = \underline{\quad} \text{ cm}^2$$

2. Calcula el área lateral del prisma

$A_L = \text{Perímetro de la base} \times \text{altura}$

$$A_L = (\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad}) \times \underline{\quad} \text{ cm}$$

$$A_L = \underline{\quad} \text{ cm} \times \underline{\quad} \text{ cm}$$

$$A_L = \underline{\quad} \text{ cm}^2$$

3. Calcula el área total del prisma

$A_L = \text{Perímetro de la base} \times \text{altura}$

$$A_L = (\underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad}) \times \underline{\quad} \text{ cm}$$

$$A_L = \underline{\quad} \text{ cm} \times \underline{\quad} \text{ cm}$$

$$A_L = \underline{\quad} \text{ cm}^2$$

$A_T = 2 \text{ bases de área} + \text{Área lateral}$

$$A_T = 2 (\underline{\quad} \times \underline{\quad}) + \underline{\quad} \text{ cm}^2$$

$$A_T = 2 (\underline{\quad}) \text{ cm}^2 + \underline{\quad} \text{ cm}^2$$

$$A_T = \underline{\quad} \text{ cm}^2 + \underline{\quad} \text{ cm}^2$$

$$A_T = \underline{\quad} \text{ cm}^2$$
