

Name: _____

Class: 3TOŚ

Mark: ____ /15

PART 1. NITROGEN CYCLE.

Read the definition and insert the proper word.

1. Not enough minerals in the soil, not rich= n
2. Ammonia is produced during this process= f
3. The process of enriching the water into nutrients= e
4. the physicochemical process leading to deposition of inorganic crystals = m
5. A harmful gas released to the atmosphere during denitrification= n

PART 2. ROCK CYCLE.

1. A type of rock created from magma, later cools down on the surface= i
2. A type of rock created from layers of particles that build up= s
3. A type of rock created with a high heat and pressure= m
4. This process includes building up particles and pressure= c
5. The process of destroying rocks by water or wind= e

TASK 3. CARBON CYCLE.

Read the sentences and insert the proper word :

1. Photosynthesis changes carbon dioxide into -c
2. What type of respiration happens in organisms consuming oxygen? a respiration
3. The process of breaking down the carbohydrates is called= d
4. In aquatic environment carbon dioxide „melts” = d into water.
5. What is CO₂ = c
