Adding and Subtracting Mixed Numbers

Addition

$3\frac{1}{2} + 1\frac{3}{4} =$

$1\frac{2}{3} + 2\frac{2}{5} =$

$2\frac{3}{4} + 2\frac{1}{8} =$

Subtraction

$3\frac{2}{3} - 2\frac{1}{4} =$

$6\frac{3}{4} - 3\frac{1}{2} =$

$4\frac{1}{2} - 1\frac{1}{3} =$

Extra 4 Experts

Three buckets are partly filled with water.

Each bucket can hold 10 litres in total.

$3\frac{1}{2}$ litres

$2\frac{3}{4}$ litres

$3\frac{4}{5}$ litres

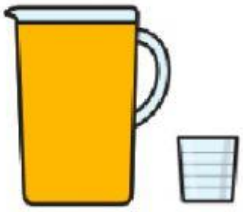

Explain your answer

Is it possible for all the water to fit into one bucket?

A jug contains $1\frac{3}{5}$ litres of orange juice.

Eva pours $\frac{4}{15}$ litres into a glass.

How much orange juice is left in the jug?
