

Unit 4 Addition and Subtraction
Adding 2-digit numbers;
Addition word problems

4.2

RECALL

KEY WORDS

- add
- addition
- altogether

KEY CONTENT

- Adding 2-digit numbers

$$45 + 37 = ?$$

- First, add the **tens**: $40 + 30 = 70$
 - Next, add the **ones**: $5 + 7 = 12$
 - Then, add the **tens** and the **ones**: $70 + 12 = 82$
- So, $45 + 37 = 82$.

- Addition word problem.

There are 27 students in class A and 28 students in class B.
How many students are there altogether?

- Circle the information. Underline the question.
- Solve the problem.

$$\boxed{27} + \boxed{28} = \boxed{55}$$

Answer: There are **55** students altogether.

PRACTICE

1. Complete. The first one has been done for you

a. $27 + 52 = \boxed{79}$

- Add the tens: $\boxed{20} + \boxed{50} = \boxed{70}$
- Add the ones: $\boxed{7} + \boxed{2} = \boxed{9}$
- Add the tens and the ones: $\boxed{70} + \boxed{9} = \boxed{79}$.

b. $14 + 68 = \boxed{}$

- Add the tens: $\boxed{} + \boxed{} = \boxed{}$
- Add the ones: $\boxed{} + \boxed{} = \boxed{}$
- Add the tens and the ones: $\boxed{} + \boxed{} = \boxed{}$.

c. $61 + 39 = \boxed{}$

- Add the : $60 + 30 = 90$
- Add the : $\boxed{} + \boxed{} = \boxed{}$
- Add the tens and the ones: $\boxed{} + \boxed{} = \boxed{}$.

d. $44 + 55 = \boxed{}$

- Add the : $\boxed{} + \boxed{} = \boxed{}$
- Add the : $\boxed{} + \boxed{} = \boxed{}$
- : $\boxed{} + \boxed{} = \boxed{}$

2. Solve these word problems.

- a. Max has 22 candies, Jack gives him 11 more candies. How many candies does Max have altogether?

$$\square \bigcirc \square = \square$$

Answer: Max has candies altogether.

- b. Lily has 34 books. Her teacher gives her another 17 books. How many books does Lily have now?

$$\square \bigcirc \square = \square$$

Answer: Lily has books now.

- c. A  picks up 30 students at one stop and 18 students at the next stop. How many students are there on the bus altogether?

$$\square \bigcirc \square = \square$$

Answer: There are students on bus altogether.

- d. Mike is reading a book. Mike reads 22 pages on Monday. He reads 28 more pages on Tuesday. How many pages of the book does Mike read in all?

$$\square \bigcirc \square = \square$$

Answer: Mike reads pages of books in all.
