26. Pain.....is one symptom of a heart attack. k. wheezing

Part 6

Read the article. Then choose the sentence in each pair that is true.

Laughter Is the Best Medicine

There's a saying in English: "Laughter is the best medicine." Now studies suggest that this saying might really be true.

Everyone knows that stress is bad for your health. It can give you headaches. It can cause heart attacks and other serious medical problems. When we laugh, our stress is reduced. Then the body is able to fight disease better.

People who laugh a lot have lower blood pressure than the average person. When a person laughs, his or her blood pressure goes down. When

this happens, breathing becomes deeper, sending more oxygen and nutrients throughout the body. Also, laughter pushes out more air from the lungs than it takes in, which helps to clean out the lungs.

Laughter is good exercise, too! Some doctors have estimated that a person can burn as many calories by laughing as by riding an exercise bike for several minutes.

Laughter can even help improve your memory. When you laugh, your muscles relax and psychological stress is reduced. This keeps the brain

alert and allows you to remember more information.

Some doctors are beginning to prescribe laughter along with certain medications and a healthy diet. It's easy to include laughter in your daily schedule. Just read something humorous or watch a funny video. And who knows—it might save your life!

Example: ☒ Laughter can help reduce stress.
☐ When you laugh, you can't have any stress.

27. ☐ Laughter can cause headaches.
☐ Laughter can help your body fight disease.
28. ☐ Laughter is a good form of exercise.
☐ If you laugh, you might not need exercise.
29. ☐ Laughter causes pleasant memories.
☐ Laughing keeps your brain healthy and helps you remember things.
30. ☐ Doctors may prescribe laughter instead of medicine.
☐ Doctors may prescribe laughter along with other things.
