In biology and ecology, the environment is all of the natural materials and living things on the Earth. This is also called the natural environment. Some people call themselves **environmentalists**. These people think that harmony with the environment is important. They think we must protect the environment. They think people should not put so much pollution into the natural environment. The important things in the environment that we value are called natural resources. For example, fish, sunlight, and forests. These are renewable natural resources because they grow naturally when we use **them**. Non-renewable natural resources are important things in the environment that do not come back naturally. For example, coal and natural gas.

Question 28. ***What does the word "environmentalists" in the line 3 mean?***
