

SCIENCE GRADE 5

1. Sound is energy in the form of vibrations passing through matter.

- A. true
- B. false

2. A vibration is a _____ back-and-forth movement.

- A. fast
- B. short
- C. long
- D. quick
- E. none of above

3. A disturbance that moves sound energy through matter is called a

- A. frequency
- B. wavelength
- C. sound wave
- D. vibration
- E. none of above

4. The number of waves that pass a point in a certain amount of time is the _____ of a wave.

- A. frequency
- B. wavelength
- C. sound wave
- D. vibration
- E. none of above

5. The distance between a point on one wave and a similar point on the next wave is called the

- A. frequency
- B. wavelength
- C. sound wave
- D. vibration
- E. none of above
