

### Five Senses Song

sight    taste    hearing    touch    smell

(chorus)

You've got one, two, three, four, five senses

Making sense of the world in a logical way

One, two, three, four, five senses

Telling you what's around you everyday

Not , One, two, three or four

You' ve got five senses

You can see, hear, smell, touch and taste

The first sense we're gonna talk about is the sense of

Use your eyes to recognize the night of day or the dark of night.

The second sense that we'll talk about is the sense of

now don't you know.

Use your ears to hear far and near

Rocking music or voices whispering soft and low

(chorus)

The third sense we're gonna talk about is the sense of

Use your nose cause' it always knows if it's rotten bad or fresh and swell

The fourth sense to talk about is the sense of

Use the skin that you're sitting in to tell hot or cold, smooth or rough

(chorus)

The fifth sense that we'll talk about is the sense of

Use your tongue when you' re old or young

To know sour lemon or sweet chocolate cake
