CREATIVE ENGLISH

what time is it?

A: read and find what time they get up (me-my sister-my father- my mother)

....

My father works in a factory and he has to be there before 7. So, he gets up very early in the mornings. My mother is a nurse but she doesn't work these days. So she doesn't have to get up early. But she gets up before me and my sister. My sister's school starts in the afternoon but she wakes up earlier because she has a lot of homework and projects. And, I study Chemistry at university but I don't have to go to school because my class is closed because of covid-19 so our professors prepare videos and we can watch them whenever we want. So, I usually wake up very late.

B: listen and find the correct one
