1. Abuna Yemata Guh is the only church built in the rocks in the Tigray Region in Ethiopia.
2. From the bottom of the cliff, there is only one path that leads to the church.
3. It was built more than 500 years ago.
4. People say Father Yemata chose this location for the chruch to test the faith of the churchgoers.
5. The church was discovered 47 years ago by the priest.
6. Visitors must take off their shoes at the top of the cliff, before entering the church.
7. The most dangerous point of the climb is just before the entrance to the church.
