

1. Zapisz działanie pasujące do rysunku. Policz pomalowane części figury i wpisz wynik dodawania.

a)

$$\frac{1}{5} + \frac{4}{5} = \frac{\square}{\square}$$

c)

$$\frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

b)

$$\frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

d)

$$\frac{\square}{\square} + \frac{\square}{\square} = \frac{\square}{\square}$$

2. Wykonaj dodawanie

$$\frac{1}{11} + \frac{5}{11} = \frac{\square}{\square}$$

$$\frac{5}{9} + \frac{3}{9} = \frac{\square}{\square}$$

$$\frac{8}{13} + \frac{4}{13} = \frac{\square}{\square}$$

3. Dodaj ułamki. Wynik przedstaw w postaci liczb mieszanych.

$$\text{a) } \frac{3}{4} + \frac{2}{4} = \frac{\square}{\square} = \underline{\square} \frac{\square}{\square}$$

$$\text{b) } \frac{5}{10} + \frac{7}{10} = \frac{\square}{\square} = \underline{\square} \frac{\square}{\square}$$

$$\text{c) } \frac{5}{6} + \frac{3}{6} = \frac{\square}{\square} = \underline{\square} \frac{\square}{\square}$$

$$\text{d) } \frac{8}{11} + \frac{6}{11} = \frac{\square}{\square} = \underline{\square} \frac{\square}{\square}$$

4. a) Dodaj ułamki. Wyniki zapisz w postaci ułamków nieskracalnych

$$\frac{3}{10} + \frac{3}{10} = \frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{1}{9} + \frac{2}{9} = \frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{1}{10} + \frac{7}{10} = \frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{4}{15} + \frac{2}{15} = \frac{\square}{\square} = \frac{\square}{\square}$$
