

Living things

Variety of living things can be found in the universe. They can be plants and animals.

				
Sugar cane	Octopus	Grass	Rose	Butterfly
				
Rabbit	Sunflower	Cat	Waterlily	Frog

a. Look at the pictures carefully. Classify the living things correctly.

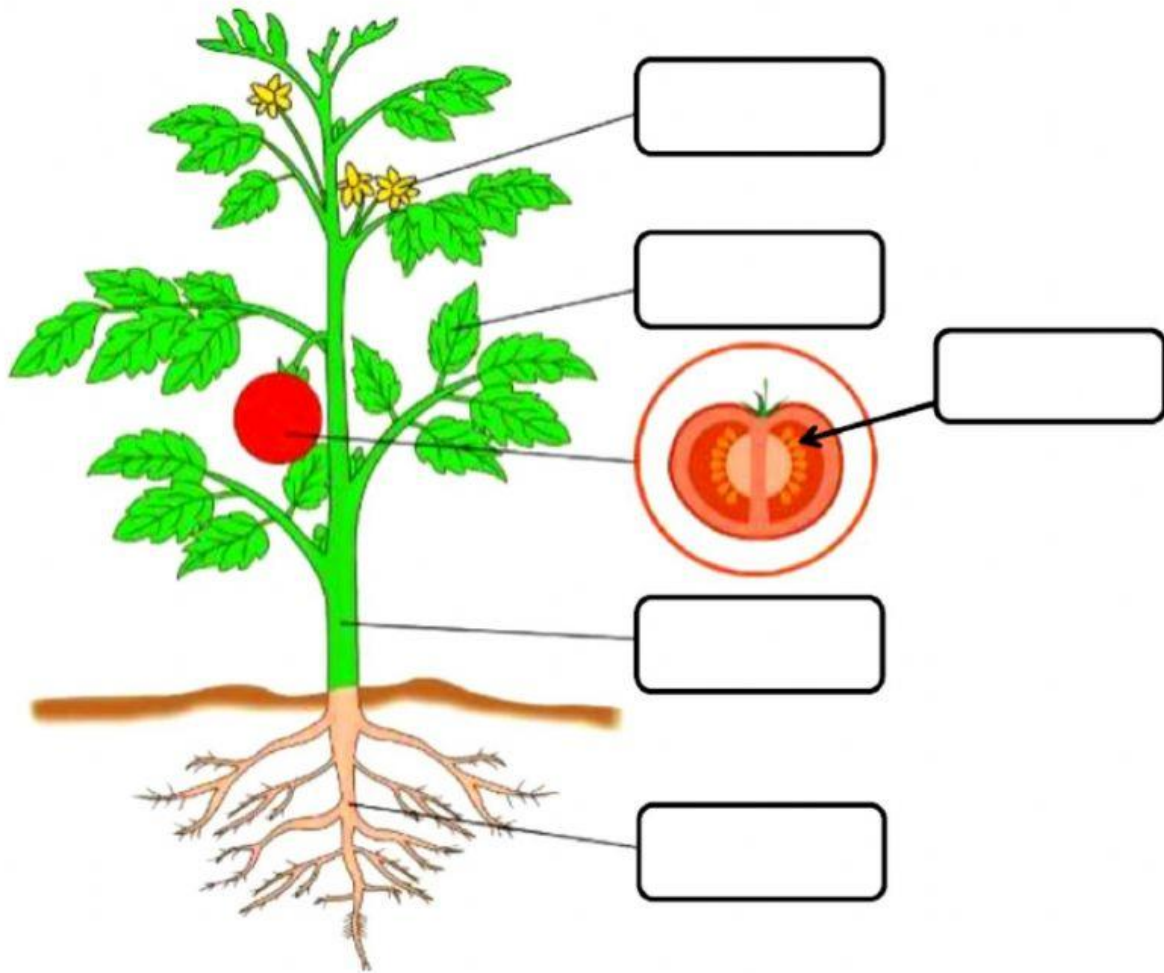

Plants	Animals

b. Classify the plants in part (a) into plants that have flowers and plants that do not have flowers. Then, name TWO OTHER examples (not from the pictures above) for each group of plants below.

Plants that have flowers	Plants that do not have flowers

c. Use the words in the box to label the parts of the plant below.

Leaf	Stem	Flower	Seed	Roots	Fruit
------	------	--------	------	-------	-------

That's ALL for today!
THANK YOU! *thank you!*
