OUR SEVEN CONTINENTS

Read the text.

The seven continents are the seven main land areas on the Earth. Some are joined to each other, and some are surrounded by water. Some continents have a lot of countries but others have only a few. Earth's seven continents are Asia, Africa, North America, South America, Antarctica, Europe, and Australia. It is believed that in past that all continents were joined together. This land area was called Pangaea. This area started to break up and got divided into 7 parts.

Answer the questions:

1. How many continents are there on the Earth?

_____

2. List all the continents.

_____

_____

LIVEWORKSHEETS

Read the text.

Asia is the largest continent. Half of the world population lives here. The world's two most populous countries are China and India is in this continent. Africa is the second largest continent. The longest river in the world is here and it is called the Nile. It is also the home of the Sahara, the largest desert in the world. Australia is the largest island and it is also the smallest continent in the world. It is also known as "island continent".
