# Nonfiction Reading: Tigers

Which cats are the largest cats in the world? Tigers!

Tigers are big, but they can run very fast. Tigers sneak up on animals like deer and buffalo. Then, tigers run to catch the animals and eat them!

Tigers can see in the dark way better than humans can. This helps them hunt at night. Tigers also love to swim! They go in the water to get away from the hot sun.

All tigers have brown or black stripes.

No two tigers have the same stripes.

Do you know any other animal that has stripes?
