

Sea Animals

Unit 5

WORKSHEET

1. Listen and number the photos

A

☐

B

☐

C

☐

D

☐

E

☐

2. Read then select True or False

Interesting Jellyfish Facts

When we are at the beach we don't like to see jellyfish because they can give you a very nasty sting. But jellyfish are very interesting creatures. They don't have a brain, a heart or bones. Some jellyfish have ways of detecting obstacles but do not have real eyes. A jellyfish's body is 95% water. They eat plankton and small fish. They use the stingers on their tentacles to kill their prey.

- | | | |
|--|------|-------|
| 1 Jellyfish can sting you. | True | False |
| 2 Jellyfish don't have a brain. | True | False |
| 3 Jellyfish have a heart. | True | False |
