

Materials

1. Are the materials natural or manufactured?

Wood

Iron

Steel

Paper

Plastic

Wool

Rock

gold

glass

2. Which is the correct definition of an alloy?

3. Match the material to its definition:

A light, soft, warm material
made from recycled plastic

Ceramic

A flexible fabric that goes very
hard when it gets wet. We can use
it to build emergency shelters in
natural disasters

Fungal foam

We put a layer on frying pans and
other cooking utensils to stop the
food sticking to them

QMilch

A fabric made from milk protein

Ceramic coating

Doctors use this material to make
artificial joints and dentists use it
to fix teeth

Fleece

A material similar to plastic but it
is made of mushrooms and
agricultural waste

Concrete fabric
