6/ Division word problems

- a) Mother has 24 pencils. She shares the pencils equally between her six children. How many pencils does each child get?

Division sentence: $\underline{\quad} \div \underline{\quad} = \underline{\quad}$

Answer: Each child gets $\underline{\quad}$ pencils.

- b) A teacher has 44 chocolates. She divides the chocolates equally between **seven** students. How many chocolates does each student get, and how many chocolates are left over (as a remainder)?

Division sentence: $\underline{\quad} \div \underline{\quad} = \underline{\quad} \text{ R } \underline{\quad}$

Answer: Each students gets $\underline{\quad}$ chocolates.

$\underline{\quad}$ chocolates are left over.
