For questions 1-8, read the text below and decide which answer (A, B, C, or D) best fits each gap.
There is an example at the beginning (0).

Example:

0 **A measure** B consider C regard D notice

Beauty is in the eye of the beholder

People have been debating the principles of beauty for thousands of years, but it still seems impossible to **(0)** ..... it objectively. German philosopher Immanuel Kant **(1)** ..... whether something can possess an objective property that makes it beautiful. He concluded that although everyone accepts that beauty exists, no one has ever **(2)** ..... on the precise criteria by which beauty may be **(3)** ..... .

Symmetry may have some significance. It has been proved to be attractive to the human **(4)** ....., in general, so perhaps a face may seem beautiful because of the **(5)** ..... between its two sides. Studies have shown that babies spend more time looking at symmetrical faces than asymmetrical ones and symmetry has also been **(6)** ..... as more attractive by adults looking at a series of photos. So although there seems to be no universal consensus on what **(7)** ..... beauty, there is at least an understanding that facial symmetry is an important **(8)** ..... .

1	A argued	B decided	C disputed	D questioned
2	A concurred	B agreed	C debated	D written
3	A judged	B appreciated	C awarded	D viewed
4	A appearance	B sight	C eye	D vision
5	A equality	B reflection	C opposition	D similarity
6	A voted	B rated	C selected	D valued
7	A constitutes	B contains	C involves	D comprises
8	A reason	B one	C role	D factor
