Borneo Pygmy elephant

It's great to see you again. There is one more rainforest animal for you to meet today. Its name is Pygmy elephant. It is one of the most endangered animals on the Island of Borneo. There are less than 1,500 Borneo Pygmy Elephant.

Pygmy elephant is very small for an elephant. It has thick and grey skin. It has a long thin tail, which almost reaches the ground. It has a long trunk and a small rounded head. Its tusks are thinner, shorter and straighter than other elephants. It has large ears and feet. A Pygmy Elephant feeds on the grasses, leaves and fruit found in the rainforest. the elephant is a very good swimmer.

Pygmy elephant likes to play. It is a very friendly and gentle little elephant.
