

PALABRAS ENCADENADAS

A word chain puzzle consisting of three rows of four green squares. The first square in the first row contains an illustration of a bunch of purple grapes. Green arrows connect the squares horizontally from left to right in each row. A long green arrow on the left side of the first row points down to the first square of the second row. Another long green arrow on the right side of the first row points down to the last square of the second row. A similar pattern of arrows connects the second row to the third row, indicating a continuous sequence of words to be placed in the empty squares.
