

## Interpreting and Presenting Data

English

Form 3

Name: \_\_\_\_\_

Put these steps in order as to how data is interpreted and presented.

1. \_\_\_\_\_ Develop the conclusions; this means to go over revise and ensure that you have proper information
2. \_\_\_\_\_ Assemble the information you need based on the text, video or graphic representation that you are taking it from
3. \_\_\_\_\_ Develop what you found by grouping and expanding on the information.
4. \_\_\_\_\_ Develop recommendations; this is to give an opinion or what you think is suitable to fix or solve or even better the piece of information.

Give four examples as to how data can be presented.

- 1.
- 2.
- 3.
- 4.
