

What changes land?

Q. Label the following: (Drag & Drop)

Weathering	Earthquake	Erosion	Volcanoe

Q. Match the following:

Weathering	happen fast, and can cause land to crack.
Earthquakes	can erupt. This sends gas, ash, and other materials into the air.
Erosion	when water, ice, or wind breaks down rocks into small pieces.
Volcanoes	is when wind, water, or other causes move rocks and soil.

Q. Describe the changing way as (Fast & Slow):

Weathering	Earthquake	Erosion	Volcanoes
