

What changes land?

Q. Label the following: (Drag & Drop)

Weathering	Earthquake	Erosion	Volcanoe
			
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

Q. Match the following:

- | | |
|--------------------|---|
| Weathering | happen fast, and can cause land to crack. |
| Earthquakes | can erupt. This sends gas, ash, and other materials into the air. |
| Erosion | when water, ice, or wind breaks down rocks into small pieces. |
| Volcanoes | is when wind, water, or other causes move rocks and soil. |

Q. Describe the changing way as (Fast & Slow):

Weathering	Earthquake	Erosion	Volcanoes
			
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
